Easily manage and enroll staff in GDPR training
The General Data Protection Regulation (GDPR) not only applies to organizations operating in the EU, but also to organizations outside the EU that process sensitive data from the EU. SecurityMetrics GDPR Defense has the tools you need to secure Personally Identifiable Information (PII) and assess your compliance with GDPR requirements. GDPR Defense was a bronze winner in the 15th Annual Info Security PG’s Global Excellence Awards for “New Product or Service of the Year.”

**ASSESS YOUR COMPLIANCE**

Track your compliance progress simply and quickly with SecurityMetrics’ guided GDPR checklist. This checklist breaks down important elements of the GDPR into actionable items so you are never left wondering what you need to do next. The checklist monitors your progress in real-time and features an organized dashboard for reporting.

If you feel like you need help understanding what is required of you, the checklist features “How to Implement” tips that explain what you need to do to complete a given requirement.

**GDPR TRAINING COURSE**

In today’s data-driven society, organizations rely on the collection and processing of user data in ever-evolving ways. Employees working in these organizations share a duty to protect the rights of individuals’ personal data, which includes complying with the EU General Data Protection Regulation (GDPR). Organizations collect the personal information of their customers and prospects for a variety of commercial reasons. Companies serving customers in the European Union have legal obligations concerning the collection and use of personal information under the General Data Protection Regulation (GDPR). This training course provides an overview of consumer rights under the GDPR and your obligations if you collect personal data.

**EASILY IMPLEMENT GDPR POLICIES AND PROCEDURES**

Part of the GDPR requires businesses to update and expand their policies and procedures to meet new regulations, such as data subject rights, consent, data retention, and breach notification. Rather than trying to build your own GDPR Policies & Procedures from the ground up, we provide templates that you can easily tailor to fit your business.

**UPLOAD GDPR POLICIES TO A CENTRAL LOCATION**

An additional feature of the SecurityMetrics GDPR checklist is the ability to store your policies in a central storage cloud, which makes them easily accessible if you need to provide proof of implementation. Feel at ease knowing that your policies are stored securely in the case of a hard drive crash or data loss.

**ACCESS YOUR GDPR IMPLEMENTATION REPORT**

In the event of a data breach, you can use the SecurityMetrics GDPR Implementation Report as proof of your efforts to become compliant. The report is easily accessible from the checklist dashboard and provides a pie graph of your implementation progress, as well as a report of your progress over time.
SecurityMetrics GDPR Defense gets you on the path to GDPR Compliance with tools like PIIscan, which locates unencrypted PII on your networks and systems.

FIND PII AT YOUR ORGANIZATION

SecurityMetrics PIIscan is a data discovery tool that assists with GDPR requirements by discovering unencrypted Personally Identifiable Information (PII) such as:

- UK National Insurance Numbers (NINO)
- Protected Health Information (PHI)
- USA Social Security Numbers (SSN)
- Australian Tax File Numbers (TFN)
- Primary Account Numbers (PAN)
- Student PII
- Magnetic Stripe Track Data

PIIscan searches computer systems, hard drives, and attached storage devices for unencrypted PII. Once PIIscan has discovered unencrypted PII, a report is generated that displays where the data is located. This makes it easy to securely delete or encrypt this data and reduce your organization’s risk. By using PIIscan, you will also save time by not having to manually search for unencrypted PII on your systems.

CONTACT AWARD-WINNING CUSTOMER SUPPORT

If you would like assistance at any point in your GDPR compliance journey, our award-winning support staff is available 24/7 to provide you with answers your questions. SecurityMetrics representatives can help guide you through the checklist and provide insight as to how to fulfill each requirement.
