# HEALTH NETWORK PORTAL

Many organizations continue to manage compliance and data security on spreadsheets, unaware of the vulnerabilities and gaps in their HIPAA compliance program. SecurityMetrics Health Network Portal provides real time visibility and transparency as well as tools to manage your risk, allowing you to reach your security and compliance goals.

## SEE YOUR NETWORK'S COMPLIANCE AT A GLANCE

Tracking and reporting security and compliance goals for your entire network can be difficult. Our portal has a dashboard that gives you key details about your HIPAA program to simplify management and automate reporting. Your dashboard includes:

- Overall compliance progress
- Network risk meter
- Vulnerability scan summary
- Business associate agreement tracking

## MONITOR INDIVIDUAL MEMBER PROGRESS

Once you understand your overall program progress, you can view individual member's compliance progress. The Summary shows your participant's progress on the Breach Protection Checklist, Risk Analysis, Risk Management Plan, and implementation of Policies and Procedures. Network administrators can also access and edit data directly in each member's individual HIPAA portal.

## MANAGE POLICIES AND PROCEDURES

Standardizing policies and best practices for your network can be difficult. Our portal provides a complete set of Policies and Procedures templates that you can edit and deploy directly to the individual member HIPAA portals linked to your network.

## TRACK YOUR BUSINESS ASSOCIATE AGREEMENTS

Ensuring Business Associate Agreements (BAA) are in place by your program participants is the first step in protecting the data they access. Our Business Associate Overview displays how many total Business Associates you have and how many have signed agreements.

YOU THE TOOLS TO  
SEE YOUR NETWORK'S  
COMPLIANCE AND  
RISK LEVELS AT A  
GLANCE**

## **DEDICATED PROGRAM MANAGER**

Support for both you and your members is vital to reduce risk and reach your HIPAA compliance goals. A dedicated Program Manager will assist in implementing communication campaigns, creating reports, and working towards your HIPAA program goals. Our Program Managers are quick to respond to any questions or needs you have.

## **SUPPORT AND GUIDANCE FOR YOUR MEMBERS**

HIPAA compliance is overwhelming and time consuming, especially for smaller organizations. Our 24/7 award-winning support team guides your program participants through every aspect of compliance to ensure you and your members reach your program goals.

## **REDUCE RISK WHILE WORKING TOWARD COMPLIANCE**

Other vendors offer compliance solutions that don't deliver tangible results. Our risk based approach not only makes progress toward HIPAA compliance, but reduces risk in measurable ways. Leveraging our vulnerability scans, thorough risk analysis and risk management plan, and our team of both HIPAA and security experts ensures your network will be more secure than before.

## **REPORT KEY COMPLIANCE AND RISK INDICATORS**

Whether you're reporting to a C-suite, board of directors, or an internal compliance and risk team, our Health Network Dashboard makes it easy to understand program progress. Receiving buy-in internally on your HIPAA program becomes easier as progress is made and gaps are identified in real time.

## **ABOUT SECURITYMETRICS**

We help customers close data security and compliance gaps to avoid data breaches. We provide managed data security services and are certified to help customers achieve the highest data security and compliance standards.

We're a PCI certified Approved Scanning Vendor (ASV), Qualified Security Assessor (QSA), Certified Forensic Investigator (PFI), and Managed Security provider with 18 years of data security experience.

We help local shops as well as some of the world's largest brands achieve data security through managed services and compliance mandates (PCI, HIPAA, GDPR).
