

How to FIND AND SECURE Unprotected PII

SecurityMetrics PIIscan searches an organization's network for unencrypted personal identifiable information (PII). This infographic examines how you can find and manage unencrypted PII.

FIND AND SECURE PII DATA:

INTERVIEW EMPLOYEES

Find out how your various departments interact with PII.

PII FLOW DIAGRAM

Know where and how PII data interacts.

RUN SOFTWARE

Run a PII data discovery tool to search for unencrypted PII.

PROTECT DATA

Properly remove and/or encrypt PII.

CONSIDER DATA STORAGE

If you don't need to, stop storing PII.

LIMIT ACCESS

Only authorized personnel should have system access.

NETWORK SEGMENTATION

Reduce the # of systems that store, process, or transmit PII.

PIISCAN SEARCHES FOR DIFFERENT PII TYPES:

- USA Social Security Numbers (SSN)
- UK National Insurance Numbers (NINO)
- Canada Social Insurance Numbers (SIN)
- Australian Tax File Numbers (TFN)
- Australian Business Numbers (ABN)
- Primary account numbers (PAN)
- Magnetic stripe track data
