Never have a false sense of security.
PCI compliance is not a single event, but an ongoing process. The Payment Card Industry Data Security Standard (PCI DSS) was established by the major card brands. All businesses that process, store, or transmit payment card data are required to implement the standard to prevent cardholder data theft.

**SIMPLIFY PCI COMPLIANCE**

PCI compliance can be frustrating for small businesses with little or no technical expertise. Since 2001, SecurityMetrics has developed methods for PCI compliance allowing you to:

- **Quickly Understand What You Need To Do** – How you process payment cards determines your PCI requirements. SecurityMetrics provides both Compliance Consultants and an online tool called SecurityMetrics Expert to help you quickly discover your PCI compliance requirements.

- **Achieve and Maintain PCI Compliance** – PCI compliance is not a single event, but an ongoing process. As your technology and card-processing situations change, SecurityMetrics PCI Focus is designed to help you achieve and maintain PCI compliance.

- **Get Professional and Experienced Support** – SecurityMetrics Support is well trained and experienced to help you get your questions answered. Whether your merchants prefer live phone support or chat, SecurityMetrics Support’s goal is simple: ensure you know how to integrate Payment Card Industry requirements in your business.

SecurityMetrics simplifies PCI compliance for you and has expert solutions to help you understand, validate, and maintain compliance with payment card processing requirements.
ACCESS EXPERT COMPLIANCE TOOLS

As criminals shift their focus towards small businesses, the following SecurityMetrics PCI compliance tools provide an edge to protect you and your customer’s sensitive data:

- **PCI Approved Scanning** – To detect threatening vulnerabilities surrounding your business network, SecurityMetrics provides unlimited industry-leading scans using its proprietary scanning engine.

- **Data Security Education** – As you fulfill your PCI requirements, SecurityMetrics provides you with video tutorials, security bulletins, reports, and articles covering solutions to current data security challenges.

- **Thorough Compliance Tracking** – Your business is provided with an online compliance reporting center allowing you to easily track your PCI progress, view your compliance grade, access compliance reports, scan reports, video tutorials, glossaries and other compliance assists for accurate compliance validation.

- **Simplified Bank Reporting** – Reporting PCI compliance to your merchant processor couldn’t be easier; once you validate PCI compliance your bank is automatically informed of your status quarterly or annually.

- **Responsive Call Center** – You don’t have to worry about an automated phone system, long wait times, or cold transfers. SecurityMetrics has the largest in-house PCI support in the world with an average inbound call pickup time of 17 seconds.

- **Security Policy Template** – To help train employees on secure operating procedures and meet security policy requirements, SecurityMetrics provides a security policy template to PCI Focus customers.

- **Antivirus Software** – By utilizing Antivirus Essentials, you will be able to protect against malware. You will also receive 24/7 support from Sophos-certified SecurityMetrics support agents, who will help you set up and manage your antivirus software.
FULL-SERVICE PCI COMPLIANCE PARTNER

To simplify your PCI compliance efforts, when you take advantage of SecurityMetrics you will benefit from the following:

• **Full-Service PCI Expertise** – With expertise in PCI assessments, forensic incident response, vulnerability scanning, penetration testing, card data discovery, security appliances, PA-DSS application security assessments, training, and consulting; SecurityMetrics is one of only a few companies that hold credentials for all aspects of PCI.

• **Expert Review and Advice on Vulnerabilities** – Leveraging its host of security professionals with expertise in every aspect of PCI and network security, SecurityMetrics provides expert review and advice on discovered vulnerabilities.

• **Fair, No-Surprise Pricing** – SecurityMetrics offers simple and straightforward pricing with a single bid that won’t change.

• **Superior Scanning Technology** – Leveraging thousands of vulnerability scripts that continuously update as they are released, SecurityMetrics scans for and reports on security holes that could enable backdoors, buffer overflows, denial of service, and other types of attacks. SecurityMetrics web application scanning can even discover SQL injection issues specific to your own custom website programming.
ABOUT SECURITYMETRICS

We secure peace of mind for organizations that handle sensitive data. We hold our tools, training, and support to a higher, more thorough standard of performance and service, so you never have a false sense of security.

We are a PCI certified Approved Scanning Vendor (ASV), Qualified Security Assessor (QSA), Certified Forensic Investigator (PFI), and Managed Security provider with over 20 years of data security experience. From local shops to some of the world's largest brands, we help all businesses achieve data security through managed services and compliance mandates (PCI, HIPAA, GDPR, HITRUST). We have tested over 1 million systems for data security and compliance.
