

SecurityMetrics

VISION

SecurityMetrics Vision senses threats inside your network to protect your business against criminals. It simplifies security management and reporting, and helps you achieve and maintain PCI DSS compliance with key requirements.

PROTECT YOUR NETWORK

Many businesses are targeted by criminals because they fail to secure and monitor their business network. SecurityMetrics Vision helps you:

- Detect security weaknesses inside your local network and subnets with internal vulnerability scanning
- Discover malicious network activity
- Monitor and scan all your locations from a single interface
- Keep safe against new threats with constantly updating scan technology

SIMPLIFY SECURITY MANAGEMENT AND REPORTING

Monitoring network threats can be expensive and difficult to manage because solutions are found in multiple products. SecurityMetrics Vision consolidates multiple network security solutions into one affordable and manageable device. Using an encrypted network tunnel, SecurityMetrics Vision is securely managed through your SecurityMetrics web account.

Using SecurityMetrics Vision you get:

- Clear threat reporting
- Simplified security management
- Real-time online threat notification
- Free technical support
- Setup in minutes

**SECURING YOUR
BUSINESS NETWORK
AGAINST CRIMINALS
CAN BE EXPENSIVE
AND CHALLENGING.

VISION PROVIDES
INTERNAL NETWORK
SECURITY FOR
BUSINESSES IN
AN AFFORDABLE,
SIMPLIFIED MANNER.**

MAINTAIN PCI DSS COMPLIANCE

SecurityMetrics Vision provides you with necessary tools to comply with many aspects of PCI DSS requirements that require network monitoring. SecurityMetrics Vision helps you:

- Implement key PCI DSS requirements
- Avoid noncompliance fees by satisfying key PCI requirements
- Save time with PCI validation by fulfilling applicable portions of your PCI Self Assessment Questionnaire (SAQ)

INTERNAL VULNERABILITY SCANNING

SecurityMetrics Vision searches networks for thousands of internal vulnerabilities that can leave your business open to card data compromise. The scan engine is updated regularly to ensure your business is safe. After each scan, detailed results are reported at the user interface. Internal scanning assists with PCI DSS requirement 11.

ABOUT SECURITYMETRICS

We help customers close data security and compliance gaps to avoid data breaches. We provide managed data security services and are certified to help customers achieve the highest data security and compliance standards.

We're a PCI certified Approved Scanning Vendor (ASV), Qualified Security Assessor (QSA), Certified Forensic Investigator (PFI), and Managed Security provider with 18 years of data security experience.

We help local shops as well as some of the world's largest brands achieve data security through managed services and compliance mandates (PCI, HIPAA, GDPR).
